Siting Study
Area Boundary

- Legend**
- Existing Duke Energy Transmission Infrastructure
 - Public Road
 - County Line
 - Preliminary Alternative Corridors
 - Greensboro-Randolph Megasite
 - Study Area Boundary

Note:
Preliminary alternative corridors are shown at a width of 400' for study purposes only. The standard rights-of-way width for a 100kV transmission line is 68 feet. When a new transmission line parallels an existing transmission line the rights-of-way width may be reduced.
